- Responsibility for exciting and challenging projects
- Flexible working hours and internal education and training opportunities
- Development opportunities on managing, specialist and project level
- Coffee, beverages, lunch allowance, fitness studio as well as staff events and much more included...

TO STRENGTHEN OUR TEAMS IN FRIESACH NEAR GRAZ AND GRAZ WE ARE LOOKING FOR:

IT LOGISTICS CONSULTANT/ REQUIREMENTS ENGINEER

Analysis and optimization of logistics processes, creation of project-specific documentation, conducting of customer trainings. You develop the ideal solution together with the customer.

Your profile: Education in (warehouse) logistics, interest in (IT) consulting. Will power to design process modifications for the customer. Enthusiasm for traveling the world.

JAVA DEVELOPER PROJECT REALIZATION

Analysis of logistics processes and development of software solutions, support with software testing. You are responsible for implementing software solutions and work in international project teams.

Your profile: Education in the area of EDP/informatics, knowledge of JAVA and databases (Oracle), UNIX/Linux would be an asset, you enjoy developing new software solutions and the contact to customers, willingness to travel.

SOFTWARE DEVELOPER IT BUSINESS OPERATIONS

Acceptance of inquiries, error analysis and error handling (bug fixing), programming tasks such as application adaptations and functional extensions. You are in charge of our international IT customers.

Your profile: Technical education, knowledge of JAVA, C or C++ and data bases (Oracle), team spirit, sense of responsibility and eloquence, high degree of service orientation.

SOFTWARE ENGINEER PRODUCT DEVELOPMENT

Software development for a database-based logistics application in JAVA, development of automated tests, documentation of the software. You further develop and design our standard product.

Your profile: Skills in software development, design and development of JAVA applications, ideally knowledge in Oracle, MS-SQL, Hibernate, UI Frameworks, Eclipse and JUnit, you enjoy forming part of an international team.

INTERNSHIP / FINAL PAPER

Gain insights into the world of SSI SCHAEFER IT Solutions while you are still getting your professional education. Send us your application for your preferred job or for the desired topic.

Your profile: Knowledge of programming language JAVA and databases (Oracle) and/or warehouse logistics knowledge, personal initiative, sense of responsibility and team spirit.

SOFTWARE SOLUTIONS

In different teams our IT experts develop the in-house warehouse management system WAMAS®. Their ideas get people and machines going.

WAMAS® provides applications for the entire warehouse management and all working areas from incoming goods to picking processes and outgoing goods. We constantly extend and optimize our portfolio of solutions and products in order to meet the ever-growing customer demands and our own quality standards. With highest IT competence, professionalism and equally great passion.

LET'S TALK ABOUT CAREER

We would be happy to discuss your career opportunities and perspectives at SSI SCHAEFER IT Solutions with you. Depending on your personal strengths and areas of interest, we will find the ideal job for you in our team.

WE ARE LOOKING FORWARD TO RECEIVING YOUR APPLICATION.

If you want to get things going and would like to participate actively in breaking new grounds, our company is the place to be!
